

# ISOVER INSULSAFE WALL

The ISOVER InsulSafe® Wall product is a product especially intended for wall blowing (BIBS).

## PRODUCT DESCRIPTION

The ISOVER InsulSafe® Wall is intended for wall blowing (BIBS). In the ISOVER InsulSafe® Wall system, ISOVER WALL-BLANKET is blown behind the gauze using special equipment. ISOVER WALL-BLANKET is stapled to the frame structure with a stapler so that the blowing pressure does not detach the gauze.

ISOVER InsulSafe® Wall is a loose insulation made of glass wool. ISOVER InsulSafe® Wall is made of inorganic and chemically neutral material and does not contain ingredients that cause corrosion. ISOVER InsulSafe® Wall is a non-decomposable and odorless product and does not provide a suitable growth surface for molds.

## TECHNICAL INFORMATION

Fireclass	A1
Thermal Conductivity (W/mK)	0,034 W/m.K
Product Approvals	CE, M1, EPD, Key Flag, Suitable for buildings with the Nordic Swan Ecolabel

## PACKAGING

Plastic and pallet packaging.
